MASAKI KLEINKOPF | Software Engineer

masaki.kleinkopf@gmail.com • Linkedin • Github

SUMMARY

Software engineer experienced at building performant, accessible, and scalable web applications. Thrives in fast-moving, collaborative environments to craft user friendly experiences. Passionate about making a positive social impact through technology.

SKILLS

Languages/Frameworks: JavaScript | Typescript | PHP | React | Remix | GraphQL | Vue | Nuxt | CSS | TailwindCSS | MySQL | Astro | Mocha | Chai | Cypress | Playwright

Tech/Tools: Git | Github | Jira | Docker | AWS S3 | Sanity CMS | Wordpress

WORK EXPERIENCE

MUNCHKIN | SOFTWARE DEVELOPER   *May 2024– Present*

Tech Stack: TypeScript, React, Remix, PHP, Shopify Hydrogen, TailwindCSS, GraphQL, Wordpress, Docker

- Developing headless e-commerce stores and custom applications
  - **Munchkin US B2C Redesign:** Built a modern, responsive e-commerce store from Figma designs. Developed a robust UI component library and dynamic PDPs powered by headless WordPress, including a custom video player and modular masonry layout.
  - **Munchkin B2B WIC:** Led development of a business-facing Shopify store with company-level accounts and custom dashboards to successfully attract new b2b customers.
  - **Munchkin UK Migration:** Rebuilt Magento site using Shopify Hydrogen, matching existing design on a new headless stack.
- **Third-party integrations:** Implemented and customized integrations for Mux (video), Ketch (consent) Yotpo and Feefo (product reviews), Algolia (search), Klaviyo (marketing), and Salesforce (live chat).
- Utilized Remix's server-side capabilities to improve SEO (via SSR) and securely access APIs (api routes).

BEAN.LA (WEB AGENCY) | WEB DEVELOPER   *Feb 2023– May 2024*

Tech Stack: Nuxt/Vue, TypeScript, SCSS, Shopify Liquid

- Built modern, content manager friendly marketing websites in fast-paced environments for brands such as LiveNation, Dublab and Salon94 utilizing Nuxt/Vue (with SSG) and SanityCMS.
- Worked on Shopify stores in both Shopify Liquid (Hanx Coffee) and headless Nuxt/Vue (Salon94). Built new features and UI including gift card functionality, quantity based discounts and meganav, leading to increased ecommerce revenue.
- Utilized serverless functions to integrate APIs such as SendGrid and Google Calendar, to simplify management for clients.

ATLANTA COMMUNITY FOOD BANK | FRONTEND DEVELOPER (CONTRACT)   *Sep 2022– Present*

Tech Stack: React, Typescript, CSS

- Build features and maintain *The Community Food Experience*, an engaging interactive simulation aimed at shedding light on the challenges faced by individuals experiencing food insecurity.

EDUCATION

Turing School of Software and Design   *Mar 2022 - Sep 2022*

Accredited Frontend Software Engineering Certificate

University of Oregon   *Aug 2019 - Jun 2021*

Master of Music (Jazz Studies) & Graduate Teaching Assistant

University of Colorado   *Aug 2013 - May 2017*

Bachelor of Music (Jazz Studies) & Teaching Assistant
